PROFILE

"Backend Developer skilled in building scalable, efficient server-side applications using Node.js.

Experienced in RESTful APIs, performance optimization, and collaborating with cross-functional teams to enhance functionality."

EDUCATION

- B. Com Computer Application | JJ College of Arts and Science | 2020 - 2023 | Pudukkottai, India
- HSC | St. Joseph Matriculation Higher Secondary School | 2019 - 2020 | Pudukkottai, India
- SSLC | Sri Lakshmi Narayana Matriculation School | 2017 - 2018 | Pudukkottai, India

SKILLS

- Programming Languages & Tools: JavaScript, Node.js, Express.js, MongoDB, HTML, CSS
- Languages: English, Tamil

PROFESSIONAL EXPERIENCE

Junior Backend Developer Intern

Stigmata Techno Solutions | January 2024 - Present | Chennai, India

- Backend Development: Assisted in backend development using Node.js and MongoDB, contributing to various projects by supporting essential tasks as required by the team.
- API Development: Developed custom APIs tailored to specific team and project requirements, enhancing workflow efficiency and overall functionality.

PROJECTS

- Blinkit App:

A Blinkit-inspired backend e-commerce platform. Built with Node.js, Express, and MongoDB. Features include product management, category handling, an admin panel, secure JWT authentication, password recovery, OTP email verification, and a powerful search system, providing a scalable solution for e-commerce.

- Movie Ticket - CRUD Operation:

A movie ticket system implementing CRUD operations. Managed two movie titles, enabling seamless ticket management and data handling.

- Weather App:

Developed a real-time weather app using HTML, CSS, and JavaScript. Integrated with APIs to display dynamic weather data.

- Calculator:

Showcased frontend expertise. Built a responsive calculator with smooth animations and rounded buttons using HTML, CSS, and JavaScript.
